INTERNSHIP

MERN Stack Intern   **Jan 2025**

Gained knowledge on how to work on MongoDB, Express, ReactJS and NodeJS. It helped me to develop projects using MERN. This internship was offered by Better Tomorrow – Training institute.

Flutter Intern   **July 2025**

Gained practical knowledge in Flutter development, including state management, widget structure, and navigation. This internship was conducted by our college to enhance mobile app development skills.

PROJECTS

RENTIFY   **github**   **May 2025**

A MERN stack application that allows users to rent various products on a time-based model. The platform enables users to post, manage, and rent products seamlessly.

CIVICFIX   **github**   **April 2025**

A system aimed at controlling corruption by ensuring transparency in public processes. It enhances accountability through real-time tracking and reporting of governance activities.

ROAD SAFETY TOOL   **github**   **August 2024**

Our app, powered by HTML and CSS, provides alerts to users when they approach caution or accident zones. Leveraging Street MapAPI, it enhances safety by offering real-time location-based notifications.

AGRO-CLIMA INSIGHTS   **github**   **April 2024**

A Django-based platform that analyzes real-time climate data via APIs to recommend optimal and sustainable land use strategies.

RELIV   **github**   **March 2024**

Reliv, a Flutter-based disaster management application designed to provide network-less communication using Beacon technology. It enables real-time rescue coordination, efficient volunteer management, and aid distribution during disaster situations. The platform ensures seamless operations even in environments with limited or no network connectivity.
